

BIOGRAPHY OF WAYNE D. DEFEO

Wayne DeFeo is the principal and founder of DeFeo Associates; a full service Environmental Consulting firm that provides clients with environmental expertise with a strong emphasis on Environmental Sustainability. Wayne has been "green" consulting for over 25 years. He has shown many clients how sustainability has evolved from admirable but impractical efforts to streamlined, cost effective conservation strategies and technologies.

Wayne specializes in the development of **sustainable solutions** for commercial, institutional and residential buildings, including every component of building operation without forgetting the most important part of the building, the people in it. He helps to develop **environmentally friendly purchasing policies, energy reduction strategies, LEED building practices, recycling and solid waste handling systems**. He works with organizations to assess environmental impacts and develop cost- and resource- saving designs, guidelines and practices. In brief, Wayne provides holistic solutions to sustainability problems.

Wayne has worked on multiple LEED certified projects that have obtained Silver or better ratings. He has helped many companies reduce their energy consumption and reduce their environmental footprint by reducing disposal of all waste types.

Wayne has over twenty - five years of experience in and outside of government. Wayne has been recognized as an environmental expert in both state and federal court and within multiple state legislatures. He has several published works on environmental issues. Wayne served as Vice Chairman & Commissioner on the Interstate Environmental Commission and lead passage of major regulations helping to reduce water pollution and developed the first sustainability mandate for this interstate agency.

Wayne continues to serve as a Faculty Coordinator at Rutgers University School of Continuing and Professional Education and has significant experience making public presentations including television and large group presentations.

He has a Bachelor of Science degree in Biology and a Master of Arts degree in Environmental Studies from Montclair State College (University). He is a Certified Teacher of Science and a LEED Accredited Professional. He has received numerous awards for his contributions to the environmental field.

Wayne currently serves on the Board of Directors for the Association of New Jersey Recyclers and the U.S. Green Building Council – New Jersey Chapter as Secretary and Advocacy Chairman.

Wayne can be contacted at:

15 Washington Valley Road
Warren, NJ 07059
